"I have a great deal of pride and gratitude for this program and everything it has to offer. Through this program, I have been able to find my dream career and take classes to help shape me into the best equine professional I can be. I have been given opportunities that I wouldn't have been able to find on my own. Through these opportunities, I have applied what I learned in my academic classes while working in the industry in many different settings and locations throughout the U.S."

"I chose Lake Erie College because of the hands-on approach to learning about the equine industry. I've gotten experience training and retraining horses, teaching riding to other students, and being involved in the daily care and management of our school horses. When I graduate, I know I will have a wealth of knowledge and experience to jump start my professional career."
